

Minecraft

Minecraft is a game where you can build anything you want. The world is made of “bricks” that the player can smash or break. You can make new things out of the blocks. There are trees to chop down, mountains to climb, and secret places to explore. It is a very popular game because there is so much to do and see.

There are two modes to the game. In “Survival” mode, the player will need to find food and water. Some creatures, like monsters or spiders, will attack the player. The most famous monster in the game is called a “ Creeper”. They will explode when they get near the player and this will probably kill them. They are called “creepers” because they are very quiet and often surprise the player.

In “Creative” mode, there are no monsters. The player can wander around the world and make anything they want. Some people have made huge ships or replicas of famous attractions like the Taj Mahal or the Eiffel Tower. Other people have made entire towns full of buildings! Some people have made a working computer in the Minecraft game. You really are only limited by your imagination!

1. Why is Minecraft a very popular game?
 - a) because it is very simple
 - b) because there are many things to do
