"Best Coffee Machine Ever!!"

After my old machine broke, I bought a series of coffee-makers that malfunctioned in a matter of weeks. One of them even started a small fire in my kitchen! Finally, I settled on the Praderhouse, which is expensive but definitely worth it. Although my original coffee maker could pump out a nice cup of coffee, the Praderhouse pours an even nicer cup of coffee in a matter of minutes.

There's also an electronic timer that shows you how long the coffee has been sitting in the pot, so you can tell whether or not it's fresh or stale. The filters that come with the Super Coffee Friend work best with it but normal coffee filters from the super-market work okay as I didn't notice a very big difference in taste when using them. Highly recommended for coffee enthusiasts and anyone who wants their favorite morning drink made right!
