.net

Traveling is becoming more expensive and it is getting more difficult to find cheap airline tickets. Below is some advice from a travel expert. There are 4 ways to save money when you buy an airline ticket:

1. Buy your ticket in advance. If you buy your ticket six weeks before you travel, it is usually cheaper. Sometimes you can get a ticket 10 percent cheaper by buying in advance.
2. Fly early in the morning. The cheapest flights are usually the first flights in the morning. This means you will have to wake up at the crack of dawn but you can save money. The next cheapest time to fly is around lunchtime.
3. Use the Internet. Usually you can buy cheaper tickets online. It is a good idea to use a website that compares prices of different airlines for you. It also makes sense to check the airlines websites yourself. This way you can get the cheapest flights.
4. Fly on Wednesdays. The cheapest day to fly is on Wednesday. Fewer people want to fly on Wednesday, so the price is lower. The most expensive days to fly are Fridays and Sundays.

1. Cheap airline tickets are very easy to find.
  - a) True
  - b) False
